CORN AND SOYBEAN TIME AGAIN

On many farms corn and soybeans are the principal money crops. Yet seed for these vital crops are often carelessly selected even by those who realize the value of sowing the best quality seed for other crops, such as clover, alfalfa and grasses. Planting carefully prepared, high germinating seed of adapted varieties costs only a few cents more per acre but what a difference there may be at harvest time.

One of the really worthwhile developments in agriculture during recent years is Hybrid Corn. Proof of its marked superiority is evidenced by the rapid acceptance of Hybrid Corn by progressive farmers everywhere.

Scotts Hybrids have proved outstanding in yield, stiffness of stalk and ability to withstand drouth and resist disease. They are produced, processed and graded with extreme care to insure accurate planting and uniform stands. If there is any doubt which hybrid you should use why not let us select the one best adapted to your soil and climate, or better still, consult your County Agent.

Various government agencies have sent out repeated warnings this spring regarding the unsatisfactory germination of soybeans. These warnings should be heeded for many lots of soybeans held back for seed actually germinate less than 70%.

We have been selecting and testing soybeans continuously since last fall and we now have a good supply of seed germinating between 85 and 90%. As usual, Scotts Soybeans are heavily recleaned and free from split beans and troublesome weeds such as wild morning glory and bindweed. In addition to the varieties quoted, we also have limited quantities of Mingo, Scioto and Dunfield in the yellow varieties. The black and brown beans are recommended for hay.

We still have ample stocks of extra good quality clover seed testing high in both purity and germination. However, because of the low supply of hardy strains of alfalfa, we suggest purchasing your requirements of this seed now, if you plan to make a summer seeding. Don't overlook Sudan Grass for your summer pastures.

The latest quotations on Scotts Seed are listed on the inside page and we don't believe you can beat them anywhere in the country, for equal quality. Bags are free and on 200 pounds or more we pay the freight charges. Prompt and safe delivery is guaranteed.

Yours very truly

Seed Price List

April 15, 1942

SCOTT'S FARM SEED is the highest quality available. It is carefully selected and thoroughly re-cleaned to remove weeds and waste. Varieties marked 99.75% will, in most cases, test higher.

SPECIALS: The grades market "Special" may be slightly off in appearance or contain a small quantity of other clovers or crop seed. This seed is clean, however, and perfectly safe to sow.

Scott's HYBRID SEED CORN

Boost your corn yield this year with Scotts Certified Hybrids. These yellow dent hybrids are outstanding for large yields, stiffness of stalk, resistance to disease and tolerance to drouth. The modern, careful processing, and accurate grading of Scotts Hybrids assure

even planting and a more uniform stand of corn. Scotts Hybrids are listed below in the order of maturity. To avoid delay in shipment when ordering late in the season, please list your second choice as some hybrids are just about sold out.

EARLY MATURING HYBRIDS

	Round Grade	Flat Grade
Ohio M 15	\$5.00 bu.	\$6.50 bu.
Ohio K 24	5.00 bu.	6.50 bu.

MEDIUM MATURING HYBRIDS

	Round Grade	Flat Grade
Iowa 939	\$5.00 bu.	\$6.50 bu.
Ohio W 17	5.00 bu.	6.50 bu.
Ohio C 14	5.00 bu.	6.50 bu.
Indiana 610	5.00 bu.	6.50 bu.

MEDIUM LATE HYBRIDS

	Round Grade	Flat Grade
U S 65	\$5.00 bu.	\$6.50 bu.
Ohio 86	5.00 bu.	6.50 bu.
U S 44	5.00 bu.	7.00 bu.
U S 13	5.00 bu.	7.00 bu.

HYBRID SWEET CORN

Golden Cross Bantam	\$.35 lb.
---------------------------	------------

The round kernel grade will produce just as well as the flat grade but special plates are usually required for accurate planting. These plates are available for most standard planters.

SEED OATS

	1 to 25 bu.	Over 25 bu.
Ceresan Treated	Per bu.	Per bu.
Columbia (Early)	\$1.25	\$1.20

TIMOTHY

Timothy (99.75% Pure)	\$4.80 bu.
Timothy (Special)	4.40 bu.

ALSIKE-TIMOTHY MIXTURE

Alsike with 20% Timothy	\$14.00 cwt.
-------------------------------	--------------

BROME GRASS

Canadian No. 1	\$21.00 cwt.
Nebraska Grown	24.00 cwt.

PASTURE GRASSES

Kentucky Bluegrass (Fancy)	\$23.00 cwt.
Canada Bluegrass	28.00 cwt.
Redtop (Fancy)	14.00 cwt.
Meadow Fescue	30.00 cwt.
Orchard Grass	36.00 cwt.
Ryegrass (Domestic)	11.00 cwt.
Ryegrass (Perennial)	18.00 cwt.
Reed Canary Grass	40.00 cwt.

PASTURE MIXTURE

A balanced mixture of grasses and clovers for establishing high-productive permanent pastures, or for reseeding old pastures. Contains Kentucky bluegrass, redtop, timothy, ryegrass, orchard grass, white clover, Ladino clover, red and alsike clovers, and alfalfa.

Sow 20 to 25 pounds per acre for a new seeding and about half that amount for reseeding an old pasture.
